

FINOVA Regulatory Standards 2026

Document Version: v1.0 (Demo Purpose)

Effective Date: January 1, 2026

Classification: Public (Demonstration)

1. Introduction

This document outlines the regulatory compliance standards for the FINOVA Digital Wallet and CBDC Ledger platform. These rules are designed to ensure adherence to Anti-Money Laundering (AML) and Know Your Customer (KYC) requirements.

2. Regulatory Rules

FIN-AML-01: Negative Balance Prohibition

All wallets must maintain a minimum balance of €0.00. Negative balances are strictly prohibited. Any transaction that would result in a negative wallet balance must be rejected.

FIN-AML-07: Tier 2 Transaction Limit

Tier 2 users are limited to €5,000 per transaction unless enhanced KYC verification is completed. Transactions exceeding this threshold require explicit compliance review and approval.

FIN-AML-12: High-Value Transaction KYC

Transactions above USD 10,000 require KYC Tier 3 verification. Users with Tier 1 or Tier 2 status cannot initiate or receive transactions exceeding this amount without upgrading to Tier 3.

FIN-AML-15: High-Risk Merchant Review

Merchants flagged as high-risk require monthly compliance review. All transactions involving high-risk merchants must be logged and subject to enhanced monitoring.

3. Compliance Verification

All technical changes to the FINOVA platform must be verified against these regulatory rules before deployment. Automated compliance checks are enforced via the GhostMode workflow.

4. Document Control

Owner: FINOVA Compliance Team
